## SITUATION SUMMARY

### EAS Test, 06/15/2016

On 06/15/16, FEMA will conduct the last in a series of multi-state tests of the new “National Periodic Test” EAS event code.

- This test will involve over 3,000 broadcast outlets in nine states drawn from FEMA Regions VII, XI and X.
- Starting at 1320 hours, Pacific time, subject to a minute or two of propagation delay through the IPAWS and EAS legacy “daisy chain”, broadcasters will sound the usual EAS tones followed by this message text:
  - “This is a National test of the Emergency Alert System. This is only a test. Broadcast and cable operators in your area have developed this system in voluntary cooperation with FEMA, the FCC and local authorities to keep you informed in the event of an emergency. If this had been an actual emergency an official message would have followed the alert tone. This concludes this National test of the Emergency Alert System.”
- This text was crafted to make this event sound as much like a regular Required Monthly Test message as possible. This is in preparation for the next full National EAS Test, currently slated for late September.
- In prior regional tests FEMA has cancelled the broadcast in states where there were ongoing events that might be confused with the test. FEMA says it will convene a conference call with NWS and state EM agencies shortly before the test to get a final go/no-go from them.
